

WINTER 2024

PEE WEE[®] AND FRIENDS

Hey Kids,

I hope you've been enjoying my favorite season just as much as me! Winter is the best for penguins, you know. I've decided to feature some of the drawings that you've sent this past year that I wasn't able to fit in before. There were so many great ones, I just want to share some more from 2023!

Awhile back, I asked you for your questions about money. You sent in some great questions and I've been a little slow answering them but I haven't forgotten! I'm going to answer another one about money and where it's made. Check out the answer on the back!

Your Friend,

Pee Wee

Did You Know?

Money doesn't last forever, but some bills have a longer life cycle than others.

According to the U.S. Currency Education Program, a \$10 bill has the shortest lifespan (at 4.5 years) while a \$100 bill has the longest (at 15 years).

Coloring Contest!

Want to win a cool prize? Tell me what your favorite winter activity is (include a drawing) and send it to me by February 15th. You will be entered to win a cool prize. And who knows...maybe I will even put your picture on my fridge! Mail your picture to me at: Pee Wee Penguin, c/o MASC, 2005 N. Kavaney Dr., Ste 201, Bismarck, ND 58501. Be sure to include your name, age, and credit union!

YOUR MONEY QUESTIONS

Awhile back, I asked you what you'd like to know about money matters and you sent in some great questions. I answered a few but there are more I'd love to answer for you! This one comes from Sienna at Postal Family Federal Credit Union.

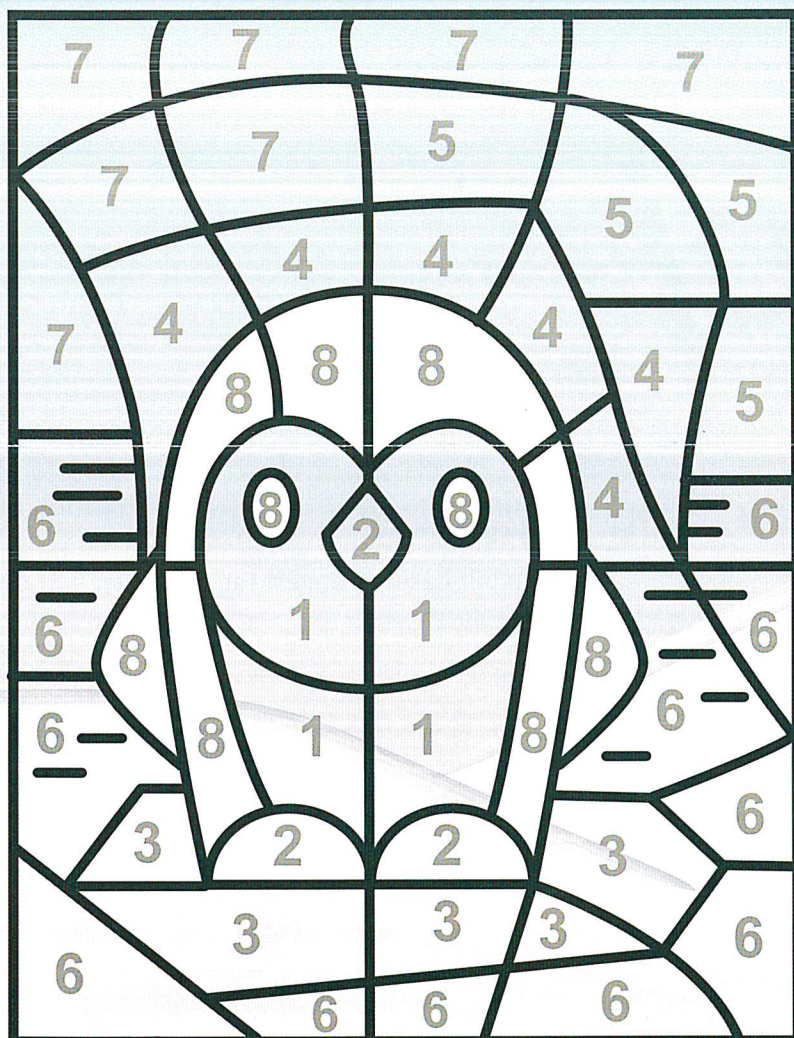

Q: Where is money made?

A: The Bureau of Engraving and Printing makes Federal Reserve notes (bills) at its facilities in Washington, D.C., and Fort Worth, Texas. The U.S. Mint makes coins at its four production facilities in Philadelphia, Denver, San Francisco, and West Point and uses a variety of machines and processes.
